# Improvement Solutions

## A brief

Parallel Construction has become very well known in the local building community earning the reputation of being a quality driven, hands on builder offering each client the individual attention necessary to surpass their expectations. While Parallel Construction operates primarily in the field from basic structure till completion of finishing works and basically concentrated in Central Region and Western Region.

From small to large projects, our goal is to increase the function of your plant, warehouses, homes, making it a beautiful well-designed space. We strive to understand the needs of our clients and implement the most cost effective solutions.

## Our Capabilities

The traditional approach to construction involves the assembly of Parallel Construction, selected subcontractors, and material suppliers working under the direction of our project engineers. We have the capability of performing :

- Civil Contracting
- Electrical Works
- Mechanical Works
- Interior Designing Projects
- Warehouse Projects
- Maintenance Projects

Parallel Construction is a full-service general contractor. We work closely with all members of the project team from project inception through commissioning and post occupancy services. We take great pride in our workmanship and build quality works to meet high expectation of client.

Our professionals provide office support, field administration, supervision, coordination and scheduling of work. We also self perform various aspects of the work with our own experienced craft workers.
